**Scaling**

When you multiply a whole number by a fraction **LESS** than 1, the answer will be **LESS** than the whole number.  $3 \times \left(\frac{1}{2}\right) = \frac{3}{2} = 1\frac{1}{2}$

When you multiply a whole number by a fraction **GREATHER** than 1, the answer will be **GREATHER** than the whole number.  $3 \times \left(\frac{3}{2}\right) = \frac{9}{2} = 4\frac{1}{2}$

When you multiply a whole number by a fraction **EQUAL** to 1, the answer will be **EQUAL** to the whole number.  $3 \times \left(\frac{2}{2}\right) = \frac{6}{2} = 3$
